

Make your building work
smarter, not harder

Buildings can be highly inefficient. And it's impacting your people, your profits, and the planet too. Metrikus is a building efficiency platform that helps organizations to make their building space more efficient, productive, and sustainable.

What does Metrikus help you achieve?

Sustainability

Reduce the environmental impact of your building to help achieve net zero goals

Productivity

Create a healthy and productive workplace with optimal indoor air quality

Efficiency

Optimize the use of your building to reduce operating and real estate costs

Our solutions in action

MMU have reduced their energy usage by 15% to help reach net zero targets

The Met Office optimised their HVAC which improved air quality and saved 25% energy costs

A major UK bank improved their space utilization by 34%, saving them £500,000 in the first POC

Leading organizations choose Metrikus

A closer look at our solutions

- Improve the environmental impact of your buildings
- Understand trends and anomalies in energy usage
